lishment in the East.
Hongkong, 9th February, 1891.

Americans would have to fight a battle of Armageddon to decide whether the world should belong to the Mongolian or the Anglo-Saxon. If the Kolaghev only moves quickly enough, who knows but that the head of Tol-o-Kebir will be able to command the British Division in person?" Kolaghev, it may be remarked, is the Spectator's way of spelling Kolakhev.

Should the disaffection now existing in China break out into open revolt and result in the overthrow of the dynasty, what is likely to happen is that the Empire will be split up into two or three separate kingdoms. Even if its integrity were preserved, and the change stopped at the substitution of a native for a Manchu occupant of the throne, the leader, however great his military genius, would find very unpromising material in his subjects for a war of conquest. The Chinese have been themselves aggressively subjugated by the Mongols and the Manchus, and still remain under the domination of the latter. They are not a fighting race, and their national homogeneity is weak. The provinces are practically autonomous, and although they might conceivably unite in an effort to overthrow the present dynasty, when that was accomplished they would not hang together for any projects of conquest, unless in the impossible circumstances of each province being able clearly to foresee that its own gain was to be. In connection with the present crisis it is alleged that it would be unsafe to send Anfu soldiers into Hunan, because that would be the beginning of civil war, since the Huanehs, it is supposed, would resent the intrusion of troops from another province as warmly as they would the intrusion of a foreign foe. The Chinese, in fact, speak of the natives of other provinces that own them as foreigners, and at the time of the hostilities with France, when Chinese ships of war were seeking refuge from their pirates, they were not received with any cordiality in ports which conceived they had nothing to do with the affair. With this want of sympathy between the provinces—which in fact is one of the chief reasons of the Manchus having been able, in spite of their unpopularity, to continue their rule so long—there is absolutely no prospect of China ever becoming a conquering power. The idea, although it has already been pretty well exploded for all it is worth, still has a touch of sensationalism about it which will probably ensure its revival in the home press from time to time, but rests on no basis of probability or reasonable knowledge of the race.

A London newspaper was issued yesterday morning containing a proclamation by the Acting Governor prohibiting the export from docks of arms, ammunition, gunpowder, and naval and military stores, or their carriage by steamship, within the colony, for a period of six months. The proclamation is stated to be in consequence of certain representations made by the Government of the Empire of China.

About half-past one o'clock on the morning of Wednesday, September 21st, 1891, a Chinese gunboat, the "Wu-kuo," arrived at Singapore, having had a long and eventful voyage. After a short stay, during which she was examined by the Chinese naval authorities, she was allowed to proceed on her way to the Yangtze, to render protection to the foreigners at the Treaty port. She will be commanded by Lieut. Anson.

The Chinese gunboat "Wu-kuo" is to be sent up to the Yangtze, to assist in affording protection to the foreigners at the Treaty port. She will be commanded by Lieut. Anson.
